Exercises in Environmental Science contains 11 laboratory and field exercises that include both hands-on and data analysis labs to help students develop a range of skills in the environmental sciences. The manual is designed for use in an introductory course in environmental science and covers material that is digestible by both the non-science and beginning science student.

Science Textbooks :: Homework Help and Answers :: Slader

Choice (d) is correct because the fracking electricity generation uses less coal. It uses less coal because fracking utilizes drilling and high-pressured water to release gas from rocks to convert to energy. No coal is involved in the fracking process, so there would be a decreased use of coal. Contamination is a result of fracking when the water mixture used to retrieve the gas from rocks contaminates the groundwater with the chemicals and sands that are incorporated in the mixture.
